

PRATCHAYAPHONG THANANTA

Game Developer | QA Tester

About Me

I'm passionate about game development, with a growing interest in Game Design, gameplay mechanics, player experience, and Quality Assurance.

Throughout my studies, I've been exploring different aspects of game development, from developing creative ideas to understanding how gameplay systems work and how they affect the player's experience.

I enjoy learning new skills, experimenting with ideas, and finding ways to improve games through problem-solving, testing, and feedback.
